

Teacher Voice Book Club Series

Have you ever wondered how Climate Change is being addressed in classrooms? Why is climate change being addressed in this manner? *Miseducation: How Climate Change is Taught in America* by Katie Worth is a powerful tool toward starting this conversation. In our constantly changing world we must empower students to think critically about the information they encounter.

Please join Noyce Borderlands Master Teacher Fellows, Jose Hinojos and Ty White, for a constructive dialogue and discussion of these questions and more:

- How can we address climate change with our students?
- What barriers and challenges might we encounter when teaching climate change?
- Historically, what battles have been fought when it comes to climate change in education?

Let's COLLABORATE to form more engaging systems that educate students about the world's climate!

Receive your **FREE** copy of *Miseducation: How Climate Change is Taught in America* by Katie Worth!
